Septech Holdings Limited – About us

Septech Holdings Limited (SHL) was formed in 1997 as the parent company to a number of operating subsidiaries that serve as regional infrastructure operating entities across the Asia, Australia, Europe and the Middle East and North African Marketplaces.

The Establishment of SHL introduced the founders to the market place of the Middle East through number of Pre-Existing transaction that preceded in Asia and Australia by the founder and today's CEO, David Heffernan. Over the years, the group has increased its investment profile and talent pool to include the establishment of operating entities in Australia, Oman and Saudi Arabia.

Having Primary Focus on addressing the world's water shortages and related infrastructure requirements in developed and emerging markets, SHL as a group is poised to provide a number of specialized solutions to primary and secondary infrastructure markets, These include: Municipal, Industrial and Domestic. SHL draw upon the global corporate structure of specialized entities including New Water Corporation Limited, EMtech and Septech to offer solutions in the water, wastewater, mobile water, precast, marine, specialized infrastructure pipes and utilities management industry sectors.

On a backdrop of over one decade of successful operations and project execution, SHL partnered with the Middle East region's largest and most prominent Investment Bank, Shuaa Capital. The successful partnership has allowed SHL to vigorously explore global opportunities in the water and wastewater markets and make strategic investments in countries that offer future growth potential.

The group's successful track record to date has been attributed to by the quality of our outstanding people who have been drawn from a global pool of talent. We strive to excel and to maintain our position as a leading water and related infrastructure company through a highly focused approach. The future successful of SHL is driven by the committed and combined vision of its founders, allowing the group to future cement its position as the market leader in innovative water solutions.

Septech Mobile Water

Septech's Mobile Water treatment technology and services, is a clear illustration of the companies' dedication to innovation and to engineering successful solutions that are of real value to our clients.

The Mobile Water units' ability to process Sea Water (SWRO) or Brackish Water (BWRO) onsite, producing water of the highest quality is truly revolutionary. It is just another way in which Septech is ensuring our client's success.

Septech's Mobile Water Technology and Service Expertise Include:

- 24 hour / 365 days a year water production capabilities, logistics and technical support
- Concept design development / early planning stage involvement
- Independently tailored solutions according to the water shortage issue faced
- Our fleet of mobile water treatment technology and service equipment is available to meet a diversity of water quality specifications
- A dedicated team of engineers serving as Field Service Representatives (FSR) 24 hours a day to install our equipment and maintain the performance of the systems on site
- Total water treatment capability
- Emergency, short and long-term water supply options available
- Quick deployment of mobile fleet to project /contract site anywhere in G.C.C.
- De-mobilisation of units after completion of contract
- 24 hour / 365 days a year Operation & Maintenance including consumables with skilled operators
- Support on-site preparation works
- Assistance on sea water intake, Beach / Bore Wells, interconnecting pipework and all pre and post infrastructure

Technology Solution

Industries We Serve:

- Power
- Chemical Processing
- Construction
- Petrochemical
- Mining & Mineral Processing
- Food & Beverage
- Commercial & Institutional
- Municipal

Septech Mobile Water Technology and Service Products:

- Containerised water treatment technology and service units
- Seawater Reverse Osmosis (SWRO)
- Brackish Water Reverse Osmosis (BWRO)
- Multimedia Filtration (MMF)
- Ion exchange
- Membrane separation
- MobileFlow demineralised
- DEOX Process

Septech offers the region's largest fleet of mobile water treatment systems, providing Reverse Osmosis (RO) treatment, available for either emergency, supplemental, or extended term service.

Why Septech?

- A world-class diverse management team, consisting of water infrastructure specialists with local and global expertise
- A mature and solid financial base
- A prestigious shareholder profile
- A symbiotic business unit structure, allowing the tailoring of complete project
- Exclusive regional manufacturing and license agreements with global leaders
- A regional home base with presence in neighbouring Middle Eastern countries
- Specialised design-build-operate management capabilities
- Purpose built manufacturing facilities throughout the UAE
- Dedication to adhering to the most stringent global standards for manufacturing and environmental awareness
- ISO 9001:2008 Accreditation
- Compliance with IFRS Accounting Standards
